

Spectrum Information Services Document Management Corporation announces Total Document Solutions with Oracle® Content Database and becomes a Member of the Oracle PartnerNetwork.

SANTA ANA, Calif., DATE, 2006 – Spectrum Information Services Document Management Corporation, (Spectrum) a leader in document management solutions today announced it has become a member of the Oracle PartnerNetwork. Spectrum's document imaging solution will provide the conversion of legacy hard-copy physical records to digital and provide a direct ingestion of the scanned images and meta data captured from the images into Oracle® Content Database (Content DB) and Oracle Records Database (Records DB) , thus providing a Total Document Solution.

Spectrum will specialize in providing document imaging, document scanning services and data conversion that has been developed to leverage the capabilities of Oracle Content DB. Spectrum will provide complementary content management capabilities that can help companies with regulatory compliance, document capture, comprehensive document control, security and storage. Spectrum will offer Oracle customers outsourced Document Imaging and Scanning services leveraging its high-speed production environment with its automated processing procedures to perform high quality scanning services at competitive prices.

Spectrum will also provide in house turnkey scanning operations complete with workflow, training, scanning hardware and capture software so customers can scan internally, outsource or a combination thereof.

“Information management forms a crucial differentiation factor for any successful corporation”. “With increasingly strict content-related government regulations and ever-expanding content volume, we are positioned as a leader in outsourced document imaging through our secure and patented processes”, states Curtis Pilon President of Spectrum.

About Spectrum Information Services Document Management Corporation

Spectrum is a leader in document management solutions. Since 1990 we have been converting paper records into digital format accurately and on time using a clearly defined and controlled process to give our clients instant access to business critical documents from anywhere at any time. This allows our clients more time to focus on their core business processes and less time and resources on document management and retrieval.
